The Company achieved its highest ever quarterly production in Q3 for both mined and saleable metal. During Q3, HZL produced 191,684 tonnes of mined metal and 166,539 tonnes of saleable metal, an increase of 24% and 40% respectively as compared with the corresponding prior quarter. For the nine months period, mined and saleable metal production was 537,592 tonnes and 445,812 tonnes respectively, an increase of 14% and 34% over the corresponding prior period.

During Q3, saleable silver metal production was at 24,722 kilograms, an increase of 23% compared with the corresponding prior quarter. For the nine months period, saleable silver metal production was 69,879 kilograms, an increase of 24% compared with the corresponding prior period.

*The positive impact of increased volume and rupee depreciation was more than offset by the sharp decline in the zinc LME prices of nearly 55%. Average LME price for zinc and lead during Q3 was \$1,189 and \$1,251 respectively, compared with \$2,646 and \$3,262 in the corresponding prior quarter.*

*The cost of production during Q3 was higher on account of higher input costs of coal, petroleum products, and met coke and lower realization from the sale of by - products. However, towards the end of Q3, the downward trend in the unit cost of key inputs became visible, and is expected to lower the cost of production going forward.*

#### **Progress on ongoing expansion projects**

*The construction activities at the 210,000 tpa zinc smelter and 100,000 lead smelter at Rajpura Dariba with its associated 160 MW captive power plant is progressing well and as per schedule for completion by end 2009. Progress of work at the mining projects at Rampura Agucha, Sindesar Khurd and Kayar is on schedule.*

*Post completion of these projects, HZL will be the world's largest integrated zinc - lead producer with a total capacity of 1,064,000 tonnes.*
